

Full Stack Developer experienced in designing, building and shipping production-grade web applications and REST APIs end to end, including multiple live SaaS platforms. Strong on the backend with Go (Gin) and Node.js (Express, Next.js) and on the frontend with React and Next.js, working with PostgreSQL, MongoDB, Redis and RabbitMQ. Comfortable building real-time systems (WebSocket, Socket.IO) and deploying with Docker on AWS. Additional background in application security and penetration testing.

TECHNICAL SKILLS

- **Languages:** Go, TypeScript, JavaScript, Python, C#, SQL
- **Backend:** Node.js, Express.js, Next.js, Go (Gin), .NET, REST APIs, WebSocket, Socket.IO, RabbitMQ
- **Frontend:** React, Next.js, Redux, Tailwind CSS, ShadCN UI, HTML, CSS, Angular, Ionic
- **Databases:** PostgreSQL, MongoDB, Redis, DynamoDB
- **Cloud & DevOps:** AWS, Docker, Docker Compose, Cloudflare, Linux, Git
- **Security & Auth:** JWT, OAuth, OpenID, Penetration Testing

PROFESSIONAL EXPERIENCE

Freelance - Full Stack Developer & Vulnerability Researcher

May 2021 - Present

- Delivered 10+ end-to-end web and mobile projects, owning the full lifecycle from requirements and client communication to deployment and support.
- Built RESTful APIs and real-time applications with Go, Node.js and Next.js, backed by PostgreSQL and MongoDB and deployed on AWS.
- Performed penetration testing and security hardening to identify and fix vulnerabilities before delivery.

OSOFT Software - Full Stack Developer

Sep 2023 - Aug 2024

- Developed and maintained enterprise ERP applications end to end, working across both customer-facing frontends and backend services.
- Built backend services and real-time features (WebSocket) with .NET, Go and Node.js on PostgreSQL and Sybase, adding Redis caching to improve performance.
- Developed responsive frontend interfaces with Angular, Next.js and Ionic, integrated with backend REST APIs.

PROJECTS

GoSortStack — Stack Sorting Algorithm & Web Visualizer

Nov 2025 - Nov 2025

A Go implementation of the Push Swap problem that sorts integers using two stacks with the minimum number of operations, applying a cost-based optimal strategy. Includes an interactive web visualizer with step navigation, adjustable animation speed, and real-time rendering of each operation.

- **Languages:** Go · JavaScript
- **Algorithms & Data Structures:** Stack Sorting · Cost-Based Optimization · Stacks · Linked Lists

SmartSRT – AI-Powered Subtitle Generation Platform

Dec 2024 - Aug 2025

Live SaaS (smartsrt.com) that automatically generates subtitles from video and audio. Built on clean architecture with a multilingual frontend, a Go (Gin) backend, and an AWS Lambda transcription pipeline powered by the OpenAI Whisper API, with secure authentication and a global subscription-based payment system.

- **Frontend:** Next.js (App Router) · TypeScript · Tailwind CSS · ShadCN UI · React Hook Form · Zod · next-intl · AuthJS
- **Backend:** Go (Gin) · MongoDB · DynamoDB · Paddle · JWT · Resend
- **Cloud Functions:** AWS Lambda (Node.js) · OpenAI Whisper API · AWS S3
- **Deployment & Infrastructure:** Docker · Dokploy · Sentry · Cloudflare

TaskPricer – AI-Powered Project Estimation Platform, Team Project

Dec 2024 - Sep 2025

Live SaaS (taskpricer.com) platform that analyzes freelance project briefs, generates structured task breakdowns, estimates completion time using AI, and calculates price offers based on developers' hourly rates. Includes CV-based skill assessment to improve estimation accuracy.

- **Frontend:** Next.js (App Router) · TypeScript · Tailwind CSS · ShadCN UI
- **Backend:** Express.js · MongoDB · RabbitMQ · JWT · Paddle · OpenAI API · AWS S3
- **Deployment & Infrastructure:** Docker · Dokploy · Cloudflare (Page Rules, Workers)

SwiftChat – Real-Time Chat Application

May 2024 - Oct 2024

Live real-time chat app (chat.alperkarakoyun.com) with instant messaging over Socket.IO, OAuth and JWT authentication, Redis-backed sessions, and AWS S3 media storage, behind a responsive Next.js frontend.

- **Frontend:** Next.js · TypeScript · Tailwind CSS · ShadCN UI · AuthJS · Redux
- **Backend:** Go (Gin) · PostgreSQL · Redis · JWT · Socket.IO · OAuth · AWS S3
- **Deployment & Infrastructure:** Docker · Docker Compose · Sentry
